Donation Initiated in January to Give A Total 3 Million PCR Diagnostic Products Globally

Different Types of Product Forms with Stable Performance to Support Various Application Scenarios

Highly Recognized and Widely Applied in Research and Production by PCR Reagent Manufacturers

Millions of Product Validated & Used in CDC, Hospitals, ICLs via Downstream Networks of IVD Partners

10+ Years of R&D and Manufacturing Experience for Nucleic Acid Testing and So Much More for COVID-19!

COVID-19 Real Time RT-PCR Kit (PCR-Fluorogenic Probe)

1. ORF1ab and N genes simultaneous detection
2. Minimum detection 200 copies/mL
3. Lyophilized enzyme mix with a long shelf life
4. Compatible with various fluorescence-based quantitative PCR analyzers

COVID-19 Anstart One-Step RT-PCR Enzyme Mix (Lyophilized)

1. Convenient to operation and transport
2. Available in 8-tube strip or penicillin vial for different needs of sample sizes
3. Compatible with different primer probes, including COVID-19, flu, HFMD, etc.
4. Real-time RT-PCR reaction in one tube to lower contamination risk

About Fapon

Fapon is a global leading IVD raw materials & one-stop solutions company founded in 2001. As one of the top IVD companies in Asia, Fapon serves some of the multi-nation leading diagnostic companies with 700+ partnerships worldwide.

Fapon offers an unmatched product combination of reagent raw materials and IVD one-stop solutions. It has 700+ reagent raw materials available for the application of Rapid Test, ELISA, CLIA, CMIA, Molecular Diagnostics, Biochemistry. Plus the solutions for POCT, CLIA, Immunospectrophotometry, DNA Library Preparation that provide reagent and analyzer services, Fapon satisfies customers' needs in different application scenarios.
